

IGFOA Rock River Region presents the
Navigating the Future: AI Agents and Evolution of Government Business Management
Tuesday, June 16, 2026

AGENDA

June 16, 2026

- | | |
|-------------------|--|
| 11:45 AM | Registration and Networking |
| 11:50 AM | Lunch served |
| 12:00 PM - 1:30PM | Navigating the Future: AI Agents and Evolution of Government Business Management
Speaker: Matthew Prozak, AI Sales Specialist, Google Cloud |

As Artificial Intelligence moves from simple chat interfaces to autonomous "agents," local government leaders must understand how these tools will reshape municipal operations. This session provides an overview of the current AI market landscape specifically for the public sector. We will move beyond the hype to discuss how AI agents can manage complex workflows, improve data accuracy, and assist business officials in their daily roles. The presentation features a 15-minute live demonstration of an AI Agent in action, illustrating a practical use case for cities and counties.

Learning Objectives:

Participants completing this seminar should be able to:

- Identify the fundamental differences between generative AI and Agentic AI in a professional government setting.
- Evaluate the current state of the AI market and its potential impact on local government efficiency and service delivery.
- Recognize specific opportunities where AI agents can automate or enhance business management tasks within their own organizations.

Speaker Biographical Information

Matthew Prozaki is an AI Sales professional at Google, where he focuses on helping organizations leverage transformative technologies to solve complex operational challenges. Based in the Greater Chicago Area, Matthew has a proven track record of driving strategic cloud adoption and AI innovation. Prior to joining Google, he spent several years at Amazon Web Services (AWS), serving as both a Senior Account Manager and a Strategic Account Executive, where he led multi-million-dollar enterprise commitments. Earlier in his career, Matthew was a key member of the sales team at Forecast5 Analytics (now part of Frontline Education), the leading provider of advanced data analytics and decision support tools to school districts and municipal governments across America.

A graduate of the University of Notre Dame's Mendoza College of Business, Matthew is passionate about helping business leaders move beyond the technical jargon of AI to find real-world applications. He is dedicated to empowering leaders to leverage data and AI to drive innovation, productivity, and creativity within their organizations. By focusing on these core pillars, Matthew helps his clients build more resilient businesses that are better equipped to serve their stakeholders and navigate the rapidly evolving market landscape.
