Technical Bulletin 2020-1

What?

The Board has cleared guidance that addresses issues arising from the CARES Act and coronavirus diseases

Why?

The Board acted in response to numerous stakeholder requests for guidance

When?

Effective immediately

Topics Addressed

- Whether resources received from the Coronavirus Relief Fund (CRF) are subject to eligibility requirements or to purpose restrictions and how they should be accounted for
- Whether CARES Act provisions that address a government's loss of revenue should be considered an eligibility requirement, for purposes of revenue recognition
- Whether amendments to the CARES Act after the statement of net position date but prior to the issuance of financial statements are the basis for recognition in financial statements for the period reported

Topics Addressed (continued)

- How to account for forgivable loans under the Paycheck Protection Program
- Whether resources provided through certain programs to a business-type activity or enterprise fund are nonoperating revenues
- Whether outflows incurred in response to the coronavirus are extraordinary items or special items for financial reporting purposes

COVID-19 Page & Emergency Toolbox

- Guidance and resources available at www.gasb.org/COVID19
- Emergency toolbox
 - Intended to help stakeholders quickly identify the GASB's authoritative guidance that could be relevant to the current circumstances, including topics such as contingencies, going concern, prior-period adjustments, revenue and receivable recognition, and subsequent events
 - Provides links to COVID-19 resources and nonauthoritative guidance of professional organizations

Poll Question #1

What level of guidance is a GASB technical bulletin?

- b. Category B
- c. Category C
- d. None of the above

Proposals for Public Comment

Financial Reporting Model

Financial Reporting Model Improvements

Exposure Draft

Financial Reporting Model Improvements

What?

The Board proposed improvements to the financial reporting model—
Statements 34, 35, 37, 41, and 46, and Interpretation 6

Why?

A review of those standards found that they generally were effective, but that there were aspects that could be significantly improved

When?

Comment deadline
February 26, 2021

Public hearings and user forums
in March and April 2021

Overview of the Proposals

Measurement focus and basis of accounting for the governmental funds

Format of governmental funds financial statements

Clarification of operating and nonoperating in proprietary funds

Presentation of proprietary funds statement of revenues, expenses, and changes in net position

Management's discussion and analysis

Budgetary comparisons

Major component unit presentations

Unusual or infrequent items

Proposal: Recognition in Governmental Funds

Short-term financial resources measurement focus
and accrual basis of accounting

Elements from *short-term* transactions or other events recognized as the *underlying transaction or other event occurs*

Elements from *long-term* transactions and other events recognized *when payments are due*

Financial assets: cash, assets that are available to be converted to cash, and assets that are consumable in lieu of cash

Recognition in Governmental Funds (cont.)

Short-Term Transactions

Period from inception to conclusion is one year or less

Long-Term Transactions

Period from inception to conclusion is more than one year

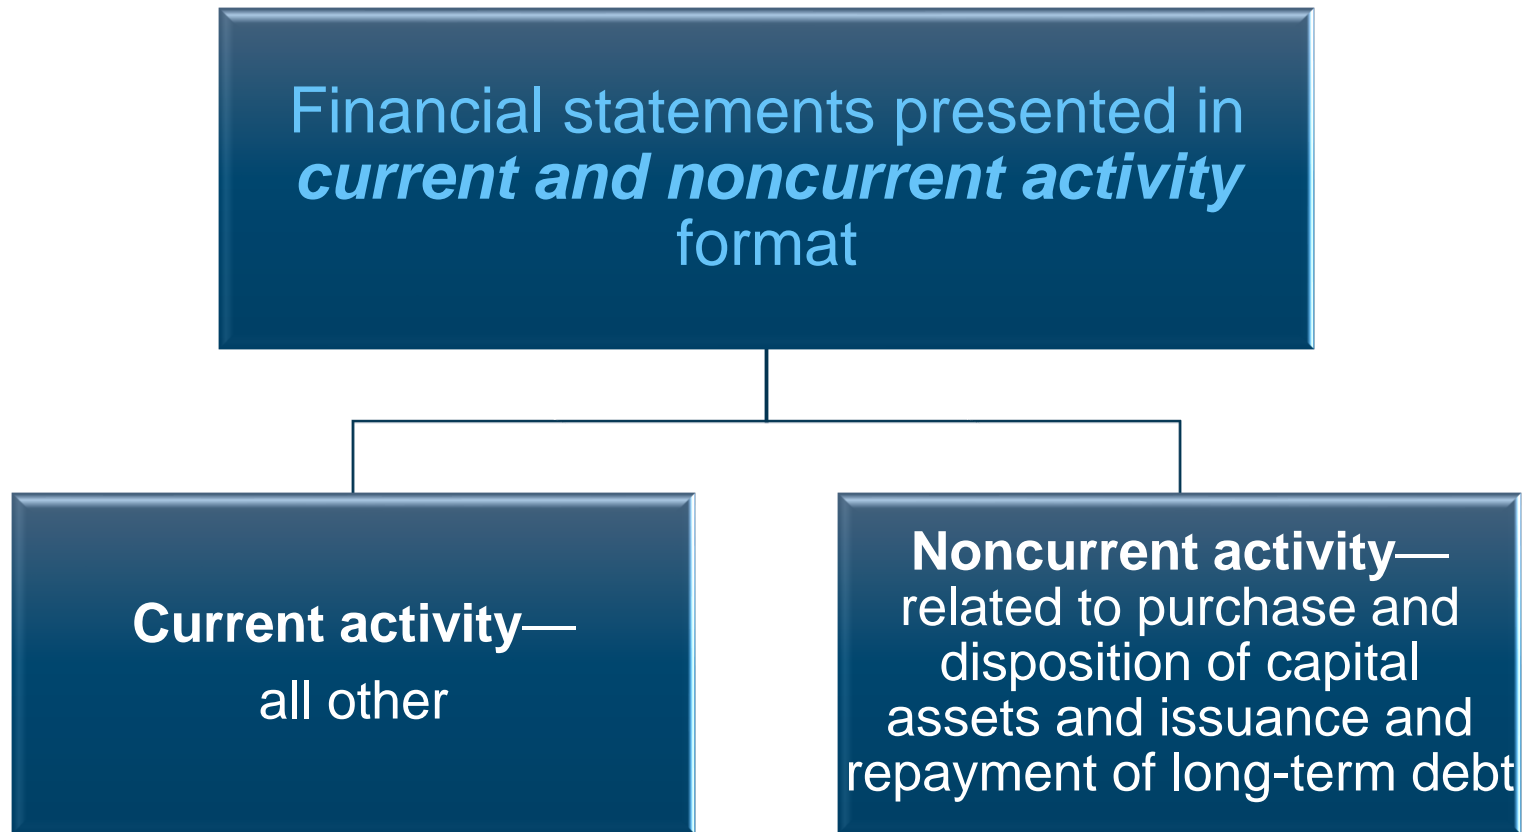

Inception

generally is when a party to the transaction takes an action that results in the initial recognition of an asset or liability

Conclusion

generally is when the final payment of cash or other financial assets is due according to the terms of the binding arrangement (or estimated payments)

Proposal: Presentation of Governmental Funds

Proposals: Management's discussion and analysis

Users of MD&A “have different levels of knowledge and sophistication about governmental accounting and finance,” “may not have a detailed knowledge of accounting principles” (as in Concepts Statement 1, paragraph 63)

Add clarification and structure to the requirement for brief discussion of the basic financial statements, including their relationships and significant differences

Emphasize the level of thoroughness required for the analysis of year-to-year changes and the need to avoid unnecessary duplication

Amend the requirements for currently known facts, decisions, or conditions with examples, such as economic trends; subsequent year's budget; actions government has taken on postemployment benefits, capital improvement plans, and long-term debt; actions other parties have taken that affect the government

Move budgetary analysis and discussion of infrastructure assets (if applicable) to the relevant parts of RSI

Other Proposals

Budgetary comparisons

- Would be presented as required supplementary information (no option for basic statements)
- Required variances would be final-budget-to-actual and original-budget-to-final-budget

Major component unit presentations

- If it is not feasible to present major component unit financial statements in separate columns in the reporting entity's financial statements, the financial statements of the major component units would be presented in the reporting entity's basic financial statements as combining financial statements

Other Proposals (continued)

Unusual or Infrequent Items

- Separately present inflows and outflows of resources that are unusual in nature and/or infrequent in occurrence (replacing extraordinary and special items)
- Disclose additional information about those inflows and outflows, including the programs, functions, or identifiable activities to which they are related and whether they are within the control of management

Proposed Effective Dates

Poll Question #2

If the GASB ultimately approves the proposed financial reporting model improvements, the format of the governmental funds flows statement will present activity that is:

- a. Current and noncurrent
- b. Operating and nonoperating
- c. Short-term and long-term
- d. None of the above

Pronouncements Being Implemented

Conduit Debt Obligations

Statement No. 91

MAY 2019

Governmental Accounting Standards Series

Statement No. 91 of the
Governmental Accounting
Standards Board

Conduit Debt Obligations

GOVERNMENTAL ACCOUNTING STANDARDS BOARD
OF THE FINANCIAL ACCOUNTING FOUNDATION

Conduit Debt

What?

The Board improved the existing standards related to conduit debt obligations by providing a single reporting method for government issuers

Why?

Interpretation 2 had been in effect for 20 years before its effectiveness was evaluated; based on GASB research, improvements were needed to eliminate diversity in practice

When?

Effective for periods beginning after December 15, 2021

Earlier application is encouraged

Definition of Conduit Debt

1. There are at least three parties involved: the government-issuer, the third-party obligor (borrower), and the debt holder or trustee.
2. The issuer and the third-party obligor are *not* within the same financial reporting entity.
3. The debt obligation is not a parity bond of the issuer, nor is it cross-collateralized with other debt of the issuer.
4. The third-party obligor or its agent, not the issuer, ultimately receives the proceeds from the debt issuance.
5. The third-party obligor, not the issuer, is primarily obligated for the payment of all amounts associated with the debt obligation.

Limited, Additional & Voluntary Commitments Extended by Issuers

Generally, issuers' commitments are **limited** to the resources provided by the third-party obligor.

Occasionally, an issuer may extend an **additional commitment** to support debt service in the event of the third-party obligor's default.

For example:

- Extending a moral obligation pledge
- Extending an appropriation pledge
- Extending a financial guarantee
- Pledging its own property, revenue, or other assets as security

Under a **voluntary commitment**, issuer voluntarily decides to make a debt service payment or request an appropriation for a payment in the event that the third-party is, or will be, unable to pay.

Recognition by the Issuer

Do *not* recognize a conduit debt obligation as a liability

May have a related liability arising out of an additional or voluntary commitment

Additional commitment: report a liability when qualitative factors indicate it is *more likely than not* that the issuer will support debt service payments for a conduit debt obligation

Voluntary commitment: if a certain event or circumstance has occurred, evaluate likelihood, then report a liability if it is *more likely than not* that the issuer will support debt service payments

Voluntary commitments for which a liability is recognized and all additional commitments: At least annually reevaluate whether recognition criteria are met while conduit debt is outstanding

Arrangements and Capital Assets

Some conduit debt obligations include arrangements* that involve capital assets to be used by the third-party obligor but owned by the issuer.

- Capital asset is built or acquired with proceeds of the conduit debt obligation.
- Issuer retains title to the capital asset from the beginning of the arrangement.
- Payments from the third-party obligor are to cover debt service payments.
- Payment schedule of the arrangement coincides with the debt service repayment schedule.

*Often characterized as “leases”

Arrangements and Capital Assets (continued)

Accounting by the issuer:

Do *not* report those arrangements as leases

Do *not* recognize a liability for the related conduit debt obligations

Do *not* recognize a receivable for the payments related to those arrangements

If the arrangement meets the definition of a service concession arrangement, follow Statement 60

Arrangements and Capital Assets (continued)

Does title pass to third-party obligor at end of arrangement?	Does the issuer recognize a capital asset?	Does the issuer recognize a deferred inflow of resources?
Yes	No	No
No, and third party has exclusive use of <i>entire</i> capital asset	Yes, when the arrangement ends	No
No, and third party has exclusive use of only <i>portions</i> of the capital asset	Yes, at the inception of the arrangement	Yes, at the inception of the arrangement; deferred inflow recognized as revenue over the term of the arrangement

Disclosures by Type of Commitment

A general description of the issuer's conduit debt obligations

- Description of limited commitments
- Description of additional commitments (legal authority and limits; length; arrangements for recovering payments from third-party obligors, if any)
- Aggregate outstanding principal amount

If the issuer recognizes a related liability

- Description of timing of recognition and measurement of the liability
- Beginning balances, increases, decreases, ending balances
- Cumulative payments that have been made
- Amounts expected to be recovered, if any, for those payments

Replacement of Interbank Offered Rates

Statement No. 93

MARCH 2020

Governmental Accounting Standards Series

Statement No. 93 of the
Governmental Accounting
Standards Board

Replacement of Interbank Offered Rates

GASB

GOVERNMENTAL ACCOUNTING STANDARDS BOARD
OF THE FINANCIAL ACCOUNTING FOUNDATION

Replacement of Interbank Offered Rates

What?

The Board has issued guidance to facilitate the transition from using IBORs in hedging derivative instruments and leases

Why?

LIBOR in its current form is expected to effectively sunset at the end of 2021

When?

LIBOR: periods *ending* after December 31, 2021

Leases: periods *beginning* after June 15, 2021

All other: periods *beginning* after June 15, 2020

Exception to Termination of Hedge Accounting

Continue to apply hedge accounting to an effective hedging derivative instrument with a variable payment based on an IBOR, if all criteria are met:

Hedging derivative instrument is amended or replaced to change the reference rate of its variable payment or add/change reference rate-related fallback provisions

The new reference rate essentially equates the old rate by :

Adjusting the new rate by a coefficient or constant, limited to what is necessary to essentially equate the rates, and/or

An up-front payment, limited to what is necessary to essentially equate the rates

The original hedging derivative instrument is ended and the replacement hedging derivative instrument is entered into on the same date

Critical terms are identical, except for term changes that are necessary for reference rate replacement (see next slide)

Other Term Changes

Term changes that may be necessary for the replacement of the reference rate are limited to:

- The frequency with which the rate of the variable payment resets
- The dates on which the rate resets
- The methodology for resetting the rate
- The dates on which periodic payments are made

Two-Step Transition to a SOFR

A hedging derivative instrument may be amended or replaced in two steps: a transition from an IBOR to another rate (such as the effective federal funds rate) prior to transitioning to a secured overnight financing rate (SOFR)

Hedge accounting continues when all of the following criteria are met:

- The first step replaces an IBOR with another rate
- That interim rate is replaced by a SOFR in the second step
- All four of the criteria for a one-step transition are met

Other Provisions

Effective Federal Funds Rate and SOFR are appropriate benchmark interest rates for taxable debt when applying the consistent critical terms method

LIBOR is no longer an appropriate benchmark interest rate for taxable debt when applying the consistent critical terms method

Replacing an IBOR as the reference rate of a hedged item does not terminate hedge accounting

Uncertainty related to the continued availability of IBORs does not, by itself, affect the assessment of whether the occurrence of a hedged expected transaction is probable

The lease modifications guidance in Statement 87 should not be applied to when a lease contract is amended solely to replace an IBOR

Effective Dates and Transition

The provision removing LIBOR as an appropriate benchmark rate is effective for reporting periods *ending* after December 31, 2021

All other provisions are effective for reporting periods beginning after June 15, 2020

Earlier application is encouraged

Should be applied retroactively, if practicable (hedge accounting should be reestablished for terminations prior to the effective date of this Statement)

Public-Private and Public-Public Partnerships and Availability Payment Arrangements

Statement No. 94

P3s, APAs, and SCAs

What?

The Board issued guidance for public-private and public-public partnerships (P3s) that are not subject to Statements 60 or 87, and improvements to Statement 60

Why?

GASB research found that some P3 transactions are outside the scope of Statement 60 and identified opportunities to improve Statement 60's guidance for service concession arrangements (SCAs)

When?

Effective for reporting periods beginning after June 15, 2022

Definitions: PPPs and APAs

Public-private partnerships and public-public partnerships (P3s) are arrangements “in which a government (the transferor) contracts with an operator [governmental or nongovernmental] to provide public services by conveying control of the right to operate a nonfinancial assets, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or exchange-like transaction.”

Availability payment arrangements (APA):

- Government contracts with another entity to operate or maintain the government's nonfinancial asset
- Entity receives payments from the government based on the asset's availability for use

Other Provisions

A P3 that meets the definition of a lease in Statement 87 – but not the definition of a service concession arrangement (SCA) – would be reported under Statement 87 unless (a) the underlying PPP assets are not existing assets of the transferor or (b) improvements are required to be made to those existing underlying P3 assets by the operator.

An APA that is related to the design, finance, or construction of an infrastructure or other nonfinancial asset in which ownership of the asset transfers by the end of the contract would be reported as a financed purchase of the asset.

An APA that is related to operations would be accounted for as flows of resources (for example, expense) in the period to which the payments relate.

Transferor Reporting

For all P3s, recognize:

- Receivable for installment payments to be received, if any
- Deferred inflow of resources for the assets recognized, including payments received from the operator at or before start of the P3 term

If underlying P3 asset is a new asset or an existing asset that has been improved...

- ...and the P3 is an SCA: also recognize the capital asset at acquisition value when placed into operation
- ...and the P3 is not an SCA: also recognize a receivable for the capital asset, measured at operator's estimated carrying value as of the future date of the transfer in ownership

Operator Reporting

For all P3s,
recognize:

- Liability for installment payments to be made, if any

If underlying P3
asset is (a) existing
asset or
improvement or (b)
new asset and the
P3 is an SCA...

- ...also recognize an intangible right-to-use asset

If underlying P3
asset is a new asset
and the P3 is not an
SCA...

- Also recognize the underlying P3 asset until ownership is transferred
- And a liability for the underlying P3 asset, measured at the estimated carrying value as of the future date of the transfer

Poll Question #3

Which pronouncement did the GASB issue after Statement 92?

- a. Statement 94
- b. Technical Bulletin 2020-01
- c. Statement 93
- d. Interpretation 5

Subscription-Based Information Technology Arrangements

Statement No. 96

Statement 96 on SBITAs

What?

The Board issued standards related to reporting subscription-based information technology arrangements (SBITAs), such as cloud computing contracts

Why?

Stakeholders were concerned that those transactions were be covered by the guidance in Statements 51 or 87; diversity existed in practice

When?

Effective for fiscal years beginning after June 15, 2022, and all reporting periods thereafter

Earlier application is encouraged

Scope and Applicability

A subscription-based information technology arrangement (SBITA) “is a contract that conveys control of the right to use another party’s (a SBITA vendor’s) IT software, alone or in combination with tangible capital assets (the underlying IT assets) as specified in the contract for a period of time in an exchange or exchange-like transaction.”

To determine whether a contract conveys control of the right to use the underlying IT assets, a government should assess whether it has both:

- The right to obtain the present service capacity from use of the underlying IT assets as specified in the contract
- The right to determine the nature and manner of use of the underlying IT assets as specified in the contract.

Scope and Applicability (continued)

- Statement 96 does not apply to:
 - Contracts that convey control of the right to use another party's combination of IT software and tangible capital assets that meets the definition of a lease in Statement 87, in which the software component is insignificant compared to the cost of the underlying tangible capital asset
 - Governments that provide the right to use their IT software and associated tangible capital assets to other entities through SBITAs
 - Contracts that meet the definition of a P3 in Statement 94
 - Licensing arrangements that provide a perpetual license to governments to use a vendor's computer software, which are subject to Statement 51

Recognition and Measurement

An SBITA should be reported under provisions effectively the same as those for a lessee under Statement 87—recognize a subscription asset and a subscription liability (except for short-term SBITAs)

Measurement of the subscription asset should include certain capitalizable implementation costs based on stages similar to those for internally developed software in Statement 51:

- Preliminary project stage
- Initial implementation stage
- Operation and additional implementation stage

Accounting for Activities Associated with a SBITA

Preliminary project stage

- Outlays should be expensed as incurred

Initial implementation stage

- In general, outlays should be capitalized
- However, if no subscription asset is recognized (such as for a short-term SBITA), outlays should be expensed as incurred

Operation & additional implementation stage

- Outlays in this stage should be expensed as incurred unless they meet specific capitalization criteria

Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans

Statement No. 97

Fiduciary Component Units and Deferred Compensation Plans

What?

The GASB has changed the criteria for including certain employee benefit plans as component units and improvements to Statement 32 on IRC Section 457 plans

Why?

Some 457 plan characteristics have changed due, in part, to changes in the IRC; questions have been raised about whether certain employee benefit plans should be included as component units

When?

Effective dates vary by topic

Earlier application is encouraged and permitted for certain topics

Relevant Guidance on Fiduciary Component Units

Paragraph 7 of Statement 84 amended Statement 14 to indicate that a primary government is considered to have a financial burden if it is legally obligated or has otherwise assumed the obligation to make contributions to a pension plan or OPEB plan

Implementation Guide 2019-2 provided guidance that in the absence of a governing board, a government performing the duties of a governing board for a defined contribution (DC) plan that is administered through a trust that meets the criteria in Statement 67 is effectively the same as appointment of a voting majority

Relevant Guidance on Fiduciary Component Units (continued)

The implication of that existing and considered guidance is that many governments would be required to report DC plans and other employee benefit plans as component units in their fiduciary fund financial statements

The Board directed the staff to conduct additional outreach on the structure of those types of arrangements and user needs for information about them

Based on the outreach, the Board decided to expand the project and issue guidance on component units

Component Unit Criteria

For purposes of determining whether a primary government is financially accountable, the absence of a governing board (when the government is perform the duties a governing board normally would perform) should be treated the same as the appointment of a voting majority of a governing board, *except for DC pension plans, DC OPEB plans, or other employee benefit plans*

The criterion that a legal obligation to contribute (or otherwise assuming the obligation) is considered to be a financial burden applies only to defined benefit plans

457 Plans

All requirements relevant to pension plan reporting should be applied to Section 457 plans that meet the definition of a pension plan

All requirements relevant to pensions should be applied by employers to benefits provided through Section 457 plans that meet the definition of a pension plan

Investments should be valued as of the end of the reporting period (allowance to use the most recent report of the plan administrator is eliminated)

Disclosure Framework

What?

The Board has proposed amendments to its concepts regarding what information should be disclosed in notes

Why?

The GASB reexamined existing note disclosure requirements and concluded that it was necessary to elaborate on the concept of “essential” as it relates to notes

When?

Comment period extended to June 30, 2020
Public hearing rescheduled to July 28, 2020

Concepts Related to Disclosures

Concepts Statements guide the Board's decisions when setting accounting and financial reporting standards

Concepts Statement 3 establishes criteria for what communication method should be used to report information – financial statements, notes to financial statements, required supplementary information, and supplementary information

Proposed Concepts

The purpose of note disclosures is to provide information that explains, describes, or supplements the financial statements and is **essential** to users in making economic, social, and political decisions and assessing accountability.

Information that has one of the following characteristics is essential:

- Characteristic A: Evidence that the information is being utilized in users' analyses for decision making or assessing accountability.
- Characteristic B: Evidence that if the information becomes available, users would modify their analyses for decision making or assessing accountability to incorporate that information.
